# WS-Design Wall panels

**W** Wallsystems  
by Glimakra of Sweden

# WS-Design Wall panels

In our standard range there are a handful of different versions of WS-Design, all with a unique laminate where the structure matches the decor. For those projects where you are looking for something completely unique, we have access to a large number of decors from the majority of laminate manufacturers. In addition to this, there is also the option of, among other things, a fire-rated core and matching edging. WS-Design is installed quickly and smoothly with our profile system which, in addition to providing a hidden installation, can also be installed with both an open and closed joint.

## WS-PANELER

Ribbon-Design is part of the product portfolio Wallsystems by Glimakra of Sweden. We are a Swedish company with value-driving factors such as Scandinavian acoustic design, greater flexibility and higher quality. Based on these, we create favorable sound landscapes for different types of environments. With broad knowledge and long experience, we develop and manufacture products in our own factories in Glimåkra and Tranås. We are the largest in Sweden for wood veneer / high-pressure laminate and through an ongoing collaboration with several prominent designers, we are always at the forefront when it comes to acoustic design.
